

Risk Summary

Preeclampsia

Medium Score: 0.6395082154771051

Model Interpretation: Risk-based triage only (not diagnosis).

Macrosomia

Medium Score: 0.5943816940585895

Model Interpretation: Risk-based coaching support.

Summary: Patient at 32 weeks gestation with a medium risk for preeclampsia due to elevated systolic blood pressure (142) and mild proteinuria (1). There is also a medium risk for macrosomia, indicated by elevated fasting glucose (99), 1-hr postprandial glucose (126), and HbA1c (5.6), alongside a high pre-pregnancy BMI (42.4). An immediate review by a doctor is recommended.

Patient Snapshot (Recent Inputs)

Parameter	Value	Notes
Blood Pressure	NA/NA mmHg	Hypertensive threshold ≥140/90, severe ≥160/110.
Proteinuria (dipstick)	NA	≥1+ supports PE suspicion in context of HTN.
Symptoms	Headache=NA, Vision=NA, RUQ Pain=NA, Swelling=NA	Severe features increase escalation priority.
Glucose	Fasting=NA mg/dL 1hr PP=NA mg/dL	Targets typically fasting <95, 1hr <140 (pregnancy goals).
HbA1c	NA	Higher HbA1c indicates sustained glycemic elevation.
Maternal Context	Age=NA BMI=NA GDM=NA	Risk modifiers for fetal overgrowth + metabolic risk.
Activity / Sleep	Post-meal walk=NA min Sleep=NA hrs	Lifestyle factors influence glycemic response.
Food Log		Used for dietary correlation patterns.

Reason for Alert

Action Requested: ALERT_DOCTOR

Clinical Rationale: ALERT: Patient TEST_MED_MED, 32 weeks gestation, has a medium preeclampsia risk tier (score 0.6395) due to Systolic BP 142 and proteinuria dipstick 1. Patient also has a medium macrosomia risk tier (score 0.594) with elevated fasting glucose (99), 1hr postprandial glucose (126), and HbA1c (5.6). Please review patient's status and consider further evaluation and management plan.

Suggested Next Steps

- Review trend: BP, symptoms, proteinuria, glucose readings
- Consider confirmatory tests (protein/creatinine ratio, LFTs, platelets) if clinically indicated
- Consider GDM diet review or insulin adjustment if glucose targets exceeded
- Provide patient education + return precautions
