

Risk Summary

Preeclampsia

Medium Score: 0.6395082154771051

Model Interpretation: Risk-based triage only (not diagnosis).

Macrosomia

Medium Score: 0.5943816940585895

Model Interpretation: Risk-based coaching support.

Summary: Patient TEST_MED_MED at 32 weeks gestation shows a medium preeclampsia risk with elevated systolic blood pressure and mild proteinuria. Macrosomia risk is also medium due to high pre-pregnancy BMI and borderline fasting glucose. Immediate alert to doctor is recommended for preeclampsia assessment.

Patient Snapshot (Recent Inputs)

Parameter	Value	Notes
Blood Pressure	142/79 mmHg	Hypertensive threshold ≥140/90, severe ≥160/110.
Proteinuria (dipstick)	1	≥1+ supports PE suspicion in context of HTN.
Symptoms	Headache=0, Vision=0, RUQ Pain=0, Swelling=0	Severe features increase escalation priority.
Glucose	Fasting=99 mg/dL 1hr PP=126 mg/dL	Targets typically fasting <95, 1hr <140 (pregnancy goals).
HbA1c	5.6	Higher HbA1c indicates sustained glycemic elevation.
Maternal Context	Age=38 BMI=42.4 GDM=0	Risk modifiers for fetal overgrowth + metabolic risk.
Activity / Sleep	Post-meal walk=29 min Sleep=6.1 hrs	Lifestyle factors influence glycemic response.
Food Log	paneer salad	Used for dietary correlation patterns.

Reason for Alert

Action Requested: ALERT_DOCTOR

Clinical Rationale: Patient TEST_MED_MED (32 weeks gestation, 38 years old, pre-pregnancy BMI 42.4) presents with a MEDIUM preeclampsia risk tier. Current vitals: BP 142/79 mmHg, proteinuria dipstick 1. No severe preeclampsia symptoms reported. Macrosomia risk tier is also MEDIUM, with fasting glucose 99 mg/dL and no GDM diagnosis. Requesting physician review and guidance for potential preeclampsia management and GDM monitoring. Patient should be seen soon.

Suggested Next Steps

- Review trend: BP, symptoms, proteinuria, glucose readings
- Consider confirmatory tests (protein/creatinine ratio, LFTs, platelets) if clinically indicated
- Consider GDM diet review or insulin adjustment if glucose targets exceeded
- Provide patient education + return precautions
