

Risk Summary

Preeclampsia

Medium Score: 0.6395082154771051

Model Interpretation: Risk-based triage only (not diagnosis).

Macrosomia

Medium Score: 0.5943816940585895

Model Interpretation: Risk-based coaching support.

Summary: The patient, at 32 weeks gestation, has a medium risk for preeclampsia due to elevated systolic blood pressure and presence of proteinuria. Macrosomia risk is also medium. Immediate physician review is recommended for the preeclampsia risk.

Patient Snapshot (Recent Inputs)

Parameter	Value	Notes
Blood Pressure	142/79 mmHg	Hypertensive threshold ≥140/90, severe ≥160/110.
Proteinuria (dipstick)	1	≥1+ supports PE suspicion in context of HTN.
Symptoms	Headache=0, Vision=0, RUQ Pain=0, Swelling=0	Severe features increase escalation priority.
Glucose	Fasting=99 mg/dL 1hr PP=126 mg/dL	Targets typically fasting <95, 1hr <140 (pregnancy goals).
HbA1c	5.6	Higher HbA1c indicates sustained glycemic elevation.
Maternal Context	Age=38 BMI=42.4 GDM=0	Risk modifiers for fetal overgrowth + metabolic risk.
Activity / Sleep	Post-meal walk=29 min Sleep=6.1 hrs	Lifestyle factors influence glycemic response.
Food Log	paneer salad	Used for dietary correlation patterns.

Reason for Alert

Action Requested: ALERT_DOCTOR

Clinical Rationale: Patient TEST_MED_MED, G32 weeks, maternal age 38, pre-pregnancy BMI 42.4. Preeclampsia risk tier: medium (score: 0.6395). Macrosomia risk tier: medium (score: 0.5944). Key vitals: BP 142/79 mmHg, Proteinuria dipstick 1. Fasting glucose 99 mg/dL, 1-hr postprandial glucose 126 mg/dL, HbA1c 5.6%. No severe headache, vision changes, upper abdominal pain, or swelling reported. Recommend immediate review due to elevated preeclampsia risk tier, borderline elevated systolic BP, and proteinuria.

Suggested Next Steps

- Review trend: BP, symptoms, proteinuria, glucose readings
- Consider confirmatory tests (protein/creatinine ratio, LFTs, platelets) if clinically indicated
- Consider GDM diet review or insulin adjustment if glucose targets exceeded
- Provide patient education + return precautions
