

Risk Summary

Preeclampsia Risk

Low Score: 0.09937414528557639

Macrosomia Risk

Low Score: 0.07752378269884633

Summary: Your risk for both preeclampsia and macrosomia is currently low, which is reassuring. Keep up your healthy lifestyle!

Today's Focus

- Continue your healthy eating habits.
- Stay active with regular movement.
- Prioritize getting enough restful sleep.
- Be aware of any warning signs and report them.

Diet Plan (Macrosomia Support)

Goal: Maintain healthy blood sugar levels and provide balanced nutrition for you and your baby.

Breakfast

- Whole-wheat toast with avocado and an egg
- Oatmeal with berries and a handful of nuts
- Yogurt parfait with granola and fruit

Lunch

- Chapati with dal and mixed vegetables
- Salad with grilled chicken or chickpeas and whole-grain croutons
- Vegetable soup with a small whole-wheat roll

Dinner

- Chapati with dal and mixed vegetables
- Baked fish or paneer with brown rice and steamed greens
- Lentil stew with a side of whole-grain bread

Snacks

- A piece of fruit (e.g., apple, orange)
- A small handful of almonds or walnuts
- Plain yogurt

Avoid / Limit

- Highly processed foods (packaged snacks, fast food)
- Sugary drinks (soda, fruit juices with added sugar)
- Deep-fried foods

Hydration Tip: Drink plenty of water throughout the day – aim for 8-12 glasses.

☐ Activity Plan

Recommended Activity: At least 30 minutes of moderate activity most days of the week, as advised by your doctor.

Post-meal Tip: Your post-meal walk of 20 minutes is excellent for managing blood sugar! Keep it up.

Safety Note: Listen to your body and consult your doctor before starting any new exercise routine. Walking, swimming, and prenatal yoga are generally safe options.

☐ Sleep Plan

Target: 7-9 hours

Tip: You reported 7.5 hours of sleep, which is good! Aim for consistent sleep by going to bed and waking up at similar times daily. Create a relaxing bedtime routine.

☐ Blood Pressure Safety (Preeclampsia)

Monitoring Tip: Your current blood pressure (118/76) is within normal limits. Continue with routine monitoring at your prenatal appointments.

Red Flags:

- Severe headache that doesn't go away
- Changes in vision (blurred vision, flashing lights, seeing spots)
- Sudden swelling in your face or hands
- Severe pain in your upper abdomen or shoulder

What to do: If you experience any of these red flags, contact your doctor or seek immediate medical attention. Do not wait.

☐ Glucose Safety (Macrosomia)

Monitoring Tip: Your fasting glucose (86 mg/dL) and postprandial 1-hour glucose (124 mg/dL) are within a healthy range. Continue with your balanced diet and regular activity.

Food Log Comment: Your food log shows 'Chapati + dal + vegetables', which is a great example of a balanced and nutritious meal!

Simple Swap Suggestions:

- Choose whole grains (like whole wheat chapati or brown rice) over refined grains.
- Pair carbohydrates with protein and fiber to help stabilize blood sugar.

☐ Daily Checklist

- Drink at least 8 glasses of water.
- Eat balanced meals with whole grains, protein, and plenty of vegetables.
- Engage in 20-30 minutes of moderate activity, like walking.
- Prioritize 7-9 hours of quality sleep.
- Monitor your body for any unusual symptoms or warning signs.

☐ Next Steps

- Continue with your routine prenatal follow-up appointments.
- Keep up your healthy lifestyle choices as they are currently working well.
- Reach out to your care team if you have any questions or concerns.
