

Risk Summary

Preeclampsia Risk

Low Score: 0.09937414528557639

Macrosomia Risk

Low Score: 0.07752378269884633

Summary: Great news! Your risk for both preeclampsia and macrosomia is low. Keep up your healthy habits!

Today's Focus

- Maintain your balanced diet with plenty of vegetables, protein, and whole grains.
- Continue with your regular physical activity, including your post-meal walks.
- Prioritize getting adequate sleep to support your well-being.

Diet Plan (Macrosomia Support)

Goal: Continue your healthy eating patterns to nourish yourself and your baby.

Breakfast

- Whole-wheat toast with avocado and a hard-boiled egg.
- Oatmeal with berries and a handful of nuts.
- Yogurt parfait with granola and fruit.

Lunch

- Your usual chapati, dal, and vegetables, perhaps with a side salad for extra fiber.
- Quinoa salad with roasted vegetables and chickpeas.
- Lentil soup with whole-grain bread.

Dinner

- Brown rice with grilled chicken or fish and steamed green beans.
- Vegetable stir-fry with tofu and a small portion of whole-wheat noodles.
- Baked sweet potato with black beans, corn, and a dollop of Greek yogurt.

Snacks

- Apple slices with peanut butter.
- A small handful of almonds and a piece of fruit.

Avoid / Limit

- Raw or undercooked meats, fish, and eggs.
- Unpasteurized dairy products.
- Excessive caffeine and highly processed foods with added sugars.

Hydration Tip: Drink at least 8-10 glasses of water throughout the day. Listen to your body and hydrate consistently.

☐ Activity Plan

Recommended Activity: Continue your 20-minute post-meal walks, aiming for at least 30 minutes of moderate-intensity activity most days.

Post-meal Tip: Your post-meal walks are excellent for digestion and blood sugar control. Keep up this wonderful habit!

Safety Note: Listen to your body, stay hydrated, and avoid activities that involve a risk of falling or abdominal trauma. Consult your doctor before starting any new exercise routine.

☐ Sleep Plan

Target: 7-9 hours

Tip: You're getting good sleep (around 7.5 hours)! Maintain a consistent sleep schedule and create a relaxing bedtime routine to support restful sleep.

☐ Blood Pressure Safety (Preeclampsia)

Monitoring Tip: Your blood pressure of 118/76 mmHg is currently healthy. Continue to monitor it regularly as advised by your healthcare provider.

Red Flags:

- A severe headache that doesn't go away.
- Changes in your vision, like blurriness, flashing lights, or spots.
- Upper abdominal pain, especially on your right side, under your ribs.
- Sudden swelling in your face or hands.

What to do: If you experience any of these symptoms, contact your healthcare provider immediately. Early detection is key.

☐ Glucose Safety (Macrosomia)

Monitoring Tip: Your glucose levels (fasting 86 mg/dL, postprandial 1hr 124 mg/dL, HbA1c 5.3%) are currently normal. Keep following a balanced diet and staying active.

Food Log Comment: Your food log shows a balanced meal of 'Chapati + dal + vegetables'. This is a good foundation for healthy eating!

Simple Swap Suggestions:

- Try adding a handful of different colored vegetables to your meals for extra vitamins and minerals.
- Experiment with whole grains like quinoa or brown rice instead of only chapati for variety.

☐ Daily Checklist

- Drink plenty of water.
- Eat a balanced diet with protein, whole grains, and lots of vegetables.
- Go for your post-meal walk.
- Aim for 7-9 hours of sleep.
- Monitor for any warning signs of preeclampsia and contact your doctor if concerns arise.

☐ Next Steps

- Continue with your regular prenatal check-up as scheduled.
