

Risk Summary

Preeclampsia Risk

Low Score: 0.09937414528557639

Macrosomia Risk

Low Score: 0.07752378269884633

Summary: Your current pregnancy health indicators for preeclampsia and macrosomia are reassuringly low. Keep up your healthy habits!

Today's Focus

- Maintain balanced nutrition
- Stay active with gentle movement
- Prioritize restful sleep
- Be aware of warning signs

Diet Plan (Macrosomia Support)

Goal: Continue with balanced meals to support your health and your baby's growth, keeping glucose levels stable.

Breakfast

- Oatmeal with berries and a sprinkle of nuts
- Scrambled eggs with spinach and a slice of whole-wheat toast
- Greek yogurt with fruit

Lunch

- Lentil soup with whole-grain bread and a side salad
- Chapati with dal and mixed vegetables (similar to your current choice)
- Grilled chicken or paneer salad with plenty of greens

Dinner

- Fish curry with brown rice and steamed green beans
- Vegetable stir-fry with tofu or chicken and quinoa
- Whole-wheat pasta with a tomato-based sauce and lean protein

Snacks

- Apple slices with a small spoonful of peanut butter
- A handful of almonds and a small orange

Avoid / Limit

- Highly processed foods
- Excessive sugary drinks and desserts
- Raw or undercooked meats and fish

Hydration Tip: Aim for 8-10 glasses of water daily to stay well-hydrated.

☐ Activity Plan

Recommended Activity: At least 30 minutes most days, as advised by your doctor.

Post-meal Tip: Great job with your current 20-minute post-meal walk! Continue this healthy habit to help manage blood sugar.

Safety Note: Always listen to your body and consult your doctor before starting any new exercise routine. Gentle activities like walking, swimming, and prenatal yoga are often safe.

☐ Sleep Plan

Target: 7-9 hours

Tip: You're getting about 7.5 hours of sleep, which is good. Aim for a consistent 7-9 hours of restful sleep each night. Try to create a relaxing bedtime routine to help improve sleep quality.

☐ Blood Pressure Safety (Preeclampsia)

Monitoring Tip: Your blood pressure is currently 118/76 mmHg, which is well within a healthy range. Continue monitoring as advised by your healthcare provider.

Red Flags:

- Severe headache that doesn't go away
- Vision changes (blurry vision, seeing spots, temporary loss of vision)
- Upper abdominal pain, especially on the right side below the ribs
- Sudden swelling of face or hands

What to do: Contact your healthcare provider immediately if you experience any of these symptoms.

☐ Glucose Safety (Macrosomia)

Monitoring Tip: Your fasting glucose (86 mg/dL), postprandial 1hr glucose (124 mg/dL), and HbA1c (5.3%) are all within healthy limits. Keep up the good work managing your blood sugar.

Food Log Comment: Your recent meal of Chapati + dal + vegetables is a good example of a balanced choice. Focus on whole grains, lean protein, and plenty of vegetables to keep blood sugar stable.

Simple Swap Suggestions:

- Swap white rice for brown rice or quinoa in your meals
- Choose whole wheat chapati or multigrain bread over refined flour options

☐ Daily Checklist

- Eat balanced meals and healthy snacks.
- Drink plenty of water throughout the day.
- Go for your post-meal walk.
- Aim for 7-9 hours of restful sleep.
- Stay aware of any changes in your body and report concerns to your doctor.

☐ Next Steps

- Continue your routine follow-up as per care plan.
