

Risk Summary

Preeclampsia Risk

Low Score: 0.09937414528557639

Macrosomia Risk

Low Score: 0.07752378269884633

Summary: Your health data looks very good with low risks for both preeclampsia and macrosomia. Keep up your healthy habits!

Today's Focus

- Maintain your balanced eating habits
- Continue regular gentle physical activity
- Prioritize restful sleep

Diet Plan (Macrosomia Support)

Goal: Support a healthy pregnancy with balanced nutrition.

Breakfast

- Oatmeal with fruit and nuts
- Whole-wheat toast with avocado and egg
- Yogurt with berries and a sprinkle of seeds

Lunch

- Dal and vegetable curry with brown rice (similar to your recent log!)
- Large salad with grilled chicken or chickpeas
- Whole-grain wrap with hummus and veggies

Dinner

- Baked fish with steamed vegetables and quinoa
- Lentil soup with a whole-grain roll
- Chicken stir-fry with plenty of colorful vegetables

Snacks

- Apple slices with peanut butter
- Handful of almonds and a small orange

Avoid / Limit

- Highly processed foods
- Excessive added sugars
- Unpasteurized dairy and deli meats

Hydration Tip: Drink plenty of water throughout the day to stay hydrated.

☐ Activity Plan

Recommended Activity: Aim for at least 30 minutes most days.

Post-meal Tip: Keep up your excellent habit of a 20-minute post-meal walk. This is wonderful for managing blood sugar!

Safety Note: Listen to your body. If any activity causes discomfort, stop and consult your doctor. Avoid activities with a high risk of falling or abdominal trauma.

☐ Sleep Plan

Target: 7-9 hours

Tip: You're consistently getting 7.5 hours of sleep, which is excellent! Continue to prioritize rest and create a calming bedtime routine.

☐ Blood Pressure Safety (Preeclampsia)

Monitoring Tip: Your blood pressure is 118/76 mmHg, which is well within a healthy range. Continue your routine prenatal check-ups where your blood pressure will be monitored.

Red Flags:

- Severe headache that doesn't go away with acetaminophen
- Changes in vision (blurry vision, flashing lights, spots)
- Upper abdominal pain (especially under the ribs on the right side)
- Sudden swelling of the face and hands

What to do: If you experience any of these symptoms, contact your doctor immediately or go to the nearest emergency room.

☐ Glucose Safety (Macrosomia)

Monitoring Tip: Your fasting glucose (86 mg/dL), 1-hour postprandial glucose (124 mg/dL), and HbA1c (5.3%) are all within healthy ranges, showing excellent blood sugar control.

Food Log Comment: Your meal of Chapati + dal + vegetables is a great example of a balanced and blood-sugar-friendly choice!

Simple Swap Suggestions:

- Choose whole-grain chapati over refined flour options
- Pair carbohydrates with protein and fiber (like your dal and veggies!)

☐ Daily Checklist

- Enjoy a balanced breakfast.
- Take your 20-minute post-meal walk.
- Drink plenty of water.
- Eat nutritious snacks.
- Prioritize getting 7-9 hours of sleep.

☐ Next Steps

- Continue with your routine prenatal care at your next scheduled visit.
- Keep up your current healthy lifestyle habits, they are working well!
