

Risk Summary

Preeclampsia Risk

Low Score: 0.09937414528557639

Macrosomia Risk

Low Score: 0.07752378269884633

Summary: Your current health metrics and reported lifestyle habits look excellent! Both your risk for preeclampsia and macrosomia are low. Keep up the great work with your healthy diet and regular physical activity, like your post-meal walks. Continuing these practices supports a healthy pregnancy.

Today's Focus

- Maintain your healthy eating habits, especially including fiber-rich foods.
- Continue with your regular physical activity, like your post-meal walks.
- Prioritize restful sleep for energy and well-being.

Diet Plan (Macrosomia Support)

Goal: Maintain healthy blood sugar levels and balanced nutrition for you and your baby, building on your excellent current habits.

Breakfast

- Whole-grain toast with avocado and egg
- Oatmeal with berries and nuts
- Greek yogurt with fruit and a sprinkle of seeds

Lunch

- Quinoa salad with roasted vegetables and lean protein
- Whole-wheat roti/chapati with dal and mixed vegetable curry
- Lentil soup with a side of whole-grain bread

Dinner

- Baked fish with steamed green beans and brown rice
- Chicken and vegetable stir-fry with a small portion of whole-wheat noodles
- Bean and vegetable chili with a small side of corn

Snacks

- Apple slices with peanut butter
- Handful of almonds and a small orange

Avoid / Limit

- Highly processed foods and sugary drinks
- Excessive caffeine (limit to 200mg/day)
- Raw or undercooked meats, fish, and eggs

Hydration Tip: Aim for 8-10 glasses of water daily to stay well-hydrated.

☐ Activity Plan

Recommended Activity: Continue your 20-minute post-meal walks.

Post-meal Tip: Your regular post-meal walks are excellent for digestion and blood sugar control. Keep up the great work!

Safety Note: Always listen to your body and consult your doctor before starting any new exercise routine during pregnancy.

☐ Sleep Plan

Target: 7-9 hours

Tip: You're getting good sleep, around 7.5 hours. Continue to aim for 7-9 hours of restful sleep each night for energy and overall well-being.

☐ Blood Pressure Safety (Preeclampsia)

Monitoring Tip: Your current blood pressure reading of 118/76 mmHg is healthy. Continue monitoring as advised by your doctor at your routine appointments.

Red Flags:

- Severe headache that doesn't go away
- Vision changes (blurry vision, flashing lights, spots)
- Upper abdominal pain (especially on the right side, under the ribs)
- Sudden swelling of face or hands

What to do: Contact your healthcare provider immediately if you experience any of these symptoms.

☐ Glucose Safety (Macrosomia)

Monitoring Tip: Your fasting glucose (86 mg/dL), 1-hour post-meal glucose (124 mg/dL), and HbA1c (5.3%) are all within healthy ranges. This is excellent!

Food Log Comment: Your recent meal of 'Chapati + dal + vegetables' is a great example of a balanced, nutritious choice that supports healthy blood sugar.

Simple Swap Suggestions:

- Swap white rice for brown rice or quinoa
- Choose whole-grain breads over refined white breads

☐ Daily Checklist

- Eat balanced meals with plenty of vegetables, lean protein, and whole grains.
- Go for your 20-minute post-meal walks to aid digestion and blood sugar control.
- Drink plenty of water throughout the day.
- Aim for 7-9 hours of restful sleep each night.
- Listen to your body and report any new or concerning symptoms to your healthcare provider.

☐ Next Steps

- Continue your routine antenatal care as scheduled.
- Keep tracking your healthy habits; they are making a positive difference!
- Your next monitoring time is around 2026-04-23.
