

Risk Summary

Preeclampsia Risk

Low Score: 0.09937414528557639

Macrosomia Risk

Low Score: 0.07752378269884633

Summary: Your health indicators are stable, and your risk for both preeclampsia and macrosomia is currently low.

Today's Focus

- Maintain healthy eating habits.
- Stay active with regular walks.
- Prioritize good quality sleep.
- Ensure adequate hydration.

Diet Plan (Macrosomia Support)

Goal: Maintain healthy blood sugar levels and provide essential nutrients for you and your baby.

Breakfast

- Oatmeal with berries and a sprinkle of nuts.
- Scrambled eggs with whole-wheat toast and avocado.
- Greek yogurt with fruit and a tablespoon of flaxseeds.

Lunch

- Lentil soup with a whole-grain roll and a side salad.
- Grilled chicken or paneer salad with plenty of colorful vegetables.
- Whole wheat chapati with dal and mixed vegetable curry.

Dinner

- Baked fish or lean chicken with brown rice and steamed greens.
- Quinoa salad with roasted vegetables and chickpeas.
- Paneer bhurji with a small portion of whole-grain bread and cucumber salad.

Snacks

- Apple slices with a small handful of almonds.
- A small bowl of fresh fruit or a hard-boiled egg.

Avoid / Limit

- Highly processed foods and sugary drinks.
- Raw or undercooked meats, eggs, and fish.
- Unpasteurized dairy products.
- High-mercury fish like swordfish or king mackerel.

Hydration Tip: Aim for 8-10 glasses of water daily, more if active or in warm weather.

☐ Activity Plan

Recommended Activity: Aim for at least 30 minutes of moderate activity most days.

Post-meal Tip: Keep up your excellent habit of walks after meals (like your recent 20-minute walk) to help manage blood sugar levels and aid digestion.

Safety Note: Always listen to your body and consult your doctor before starting any new exercise routine during pregnancy.

☐ Sleep Plan

Target: 7-9 hours

Tip: Continue prioritizing consistent sleep. Your 7.5 hours of sleep is good; aim to go to bed and wake up at similar times daily. Create a relaxing bedtime routine.

☐ Blood Pressure Safety (Preeclampsia)

Monitoring Tip: Your blood pressure of 118/76 mmHg is excellent. Continue to monitor it regularly as advised by your healthcare provider.

Red Flags:

- Severe headache that doesn't go away.
- Changes in vision, like blurred vision or seeing spots.
- Upper abdominal pain, especially on your right side below the ribs.
- Sudden swelling in your face or hands.

What to do: If you experience any of these symptoms, contact your healthcare provider immediately.

☐ Glucose Safety (Macrosomia)

Monitoring Tip: Your glucose levels (Fasting: 86 mg/dL, 1-hour post-meal: 124 mg/dL, HbA1c: 5.3%) are all within a healthy range. Continue your balanced eating and activity.

Food Log Comment: Your meal of 'Chapati + dal + vegetables' is a great example of a balanced and nutritious choice that helps keep blood sugar stable.

Simple Swap Suggestions:

- Choose whole grains like brown rice or whole-wheat bread/chapati instead of refined grains.
- Opt for lean proteins like chicken, fish, beans, or lentils with every meal.

☐ Daily Checklist

- Eat balanced meals with whole grains, lean protein, and lots of vegetables.
- Take your post-meal walk.
- Drink plenty of water.
- Aim for 7-9 hours of sleep.
- Monitor for any unusual symptoms and report them to your doctor.

☐ Next Steps

- Your next monitoring time is scheduled for April 10, 2026. Please attend all your routine prenatal appointments.
